

# main line luxury

*This home reflects a timeless, European classic design style with important architectural details. The design focuses on symmetry while allowing the room to balance visually. The spaces remain neutral in soft bones and cream tones with trim accents for a tailored look. The hand-forged black iron chandelier and lantern-style sconces offer classic elements in this space.*

*The kitchen epitomizes a European classic style with honed marble countertops and glass tile backsplash. A playful antique mirrored glass chandelier finishes the style.*

*The library loft takes inspiration from a Jeffersonian interior. It includes detailed classic molding with a semi-circular wood bookcase of leather bound vintage books and armillary accessories.*

*In the dining room, the antiqued silver leaf ceiling showcases a rock crystal and iron chandelier. The walls are finished in a fine Venetian plaster that are embossed with antique lace, to add an Old World age and vintage feeling to a brand new home.*
